PROFESSIONAL SUMMARY

Detail-oriented first-year Computer Science undergraduate with a strong foundation in frontend development principles and core programming logic. Well-versed in building structured, responsive interfaces using JavaScript, React.js, and Tailwind CSS, alongside foundational coding experience in Python and C++. Eager to secure a frontend developer internship to write clean code, support development teams, and expand technical skillsets in a collaborative real-world environment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS
Languages: Python, C++
Tools: Git, GitHub, VS Code, Figma
Currently Learning: Next.js, TypeScript

PROJECTS

To-Do Management App | JavaScript, HTML5, CSS3, LocalStorage API

- Built a responsive task management application featuring data persistence via the browser LocalStorage API to retain tasks upon page refreshes.
- Implemented dynamic DOM manipulation to execute core functionality including adding, checking off, and deleting items without page reloads.

Jarvis AI Assistant | Python

- Developed a desktop terminal utility using structured programming to handle, parse, and execute text or basic voice-driven system commands.
- Organized application logic into modular, reusable functions to scale basic command parsing workflows efficiently.

Typing Speed Analyzer | Python

- Created a console application to track keyboard inputs, calculating accuracy rates and words-per-minute metrics based on dynamic prompt matching.
- Programmed basic conditional input verification blocks to track character mismatches and manage session timing logic cleanly.

Pomodoro Productivity Timer | JavaScript, HTML5, CSS3

- Constructed a web-based utility using asynchronous JavaScript native timer APIs to handle precise countdown adjustments across focus blocks and breaks.
- Applied CSS rules to guarantee responsive layout alignments across varying screen sizes and mobile viewpoints.

EDUCATION

Bachelor's Degree in Computer Science (Pursuing)

Mumbai, India

Timeline: 2025 — Present

Higher Secondary Certificate (12th Grade) — Science Stream

Completed: 2024

Mumbai, India

Secondary School Certificate (10th Grade)

Mumbai, India

Completed: 2022
